

Summary of Findings

Key Insights from SQL Queries:

1. **Order & Sales Analysis:**
 - Sales are steadily increasing, with a slight decrease in cancellations, highlighting areas for improved order fulfillment.
 - Trends indicate growing customer trust, as shown by increasing average order values.
2. **Payment Analysis:**
 - Successful payments are increasing, needed improvements in the payment system.
 - Payment patterns indicate efficiency, with a higher rate of completed transactions over failed ones.
3. **Customer Analysis:**
 - Customer segmentation based on frequency and recency reveals opportunities for targeted marketing.
 - Identified high spenders, which can guide retention strategies to prioritize valuable customers.
4. **Order Details Report:**
 - Analysis of order amounts and repeat purchase behavior shows how long customers wait to reorder, enabling better-targeted retention campaigns.
 - Payment integration with customer data highlights areas for payment process improvements.
5. **Customer Retention (Power BI Visuals):**
 - Segmentation of customers into active, at-risk, and inactive groups helps tailor retention strategies.
 - Insights suggest that re-engagement efforts should focus on at-risk customers and loyalty rewards for high spenders.

Observations from Customer Retention Analysis:

- A large portion of customers are loyal, but significant at-risk and inactive segments require attention.
- High spenders are more likely to stay loyal, whereas lower spenders are more likely to drop off.
- Retention efforts should be tailored to customer behavior, with high-value customers receiving loyalty incentives and at-risk customers targeted with re-engagement offers.

Recommendations for Alt Mobility:

- **Focus on High-Value Customers:** Implement loyalty programs to retain high spenders and offer personalized rewards.
- **Re-engage At-Risk Customers:** Target customers with recent inactivity using tailored offers to bring them back.
- **Optimize Payment Systems:** Address payment issues to reduce failed transactions and improve customer experience.
- **Customize Marketing Campaigns:** Use segmentation to personalize marketing strategies for active, at-risk, and inactive customers.
